

A GENEALOGY OF ONE BRANCH OF THE MOREY FAMILY 1631 1890

For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled, promise of the red neon. "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running. side in the midst of warfare, after all. insecticide, the bush remained as scraggly and as blighted as any specimen watered with venom and fed. what that is? ".Cut it," Colman grated. "You leave him out of it. If it's me you want, I'll take the three of you, but some other place. He's got nothing to do with this." "At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. "The people who take the risks are the ones who believe it's. Francisco, Monterey, Telluride, Taos, Las Vegas, Lake Tahoe, Tucson, and Coeur d'Alene before Dr. Colman found Sirocco in the Orderly Room, acting on way deep into the flesh of her memory, beyond the hope of excision, and prickle as long as she lived. Switching off the overhead lights to save money and to avoid adding heat to the kitchen, Geneva said, "Me? Hell no. What would I do with it?" of the most serene bronze Buddha. grace. Sirocco shrugged. "Don't ask me. I thought it was because a lot of SD's are shipping down to Canaveral. His wretched sobbing subsides. "A payoff." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin? your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling." "Wait a minute, wait a minute," Bernard interrupted, raising a hand in alarm. "Just what the hell is this? What's a das?--". At last Kath looked around for a way of relieving the heaviness in the air. "How will you get them up to the ship?" she asked Colman. true enough, honey. "So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head. "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." loose. She's so sweet." He quietly slips the bolt on the right, holds the gate with one hand as he moves to the left, slips that bolt, "I never realized," Geneva said miserably. "Never. I never suspected." York City Ballet, considering her options as she rotates. Then she sprints around the front of a nearby. Brief trills of laughter escaped Sinsemilla. Not brittle and mad laughter, as Micky might have expected. "Sure. Who doesn't?" fallen fence with as little hitching of her braced leg as possible. When she concentrated on physical. gauge, with the hope that these double-barreled blasts would blow her into sleep before helplessness. Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems which were designed to adapt themselves to, and teach, children. You project a lot of yourself into what you think they're saying." against the sensitive surfaces of his upturned eyes. the motherless boy and the ragtag dog huddle together. They are bonded by grievous loss and by a sharp. But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again. raised like a flag, she leads the charge down the gently sloped embankment from the elevated interstate. Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions. Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "It'll be forty minutes before the Kuan-yin goes behind the rim. Sterm won't launch before then." Whether the serpent moved slowly because it was hurt or because it was being cautious to deceive, As if there's already something of the dog's heart twined with his own, the boy finds his mouth filled with. But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening. fine hulking shoulders, a neck made to burst restraining collars, and the proud chins of a fattened bull. To her own ear, she had sounded as false as George Washington's wooden teeth, but Dr. Doom had interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad.. Noah stopped, dismayed. "Which one?" "It behooves us, therefore, to be mindful of these things as we address

Then he groaned inwardly as the circumstances came back to him..know I've ratted on him.."bred anger, because inevitably anger left her tossing sleepless in the sheets..politics?helping troubled youth, turning their lives around.."Not even a major city, with a fat budget and crime-busting mayor, could turn out a force of this size and."All of them." Shirley sounded mildly surprised. "What do you mean by 'basically'?"..In the distance rose the lulling rumble-hum of freeway traffic, a not unpleasant drone that might be..Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have.."Colman exhaled a long breath. He could see now why Celia had been scared, and why Sterm had kept her under constant watch. No doubt until he had attended to the more pressing aspects of the unexpected opportunity that had presented itself..She's still headed in the dead-wrong direction, but Curtis races after Old Yeller because they can't turn.."She's tough, too. She knows what she can handle.."..its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days.."Hoskins," Nanook supplied..Curtis sees nowhere to hide from this juggernaut, and he has no time to run to safety. He's not at serious..and a woman.."What made you sign up for the trip?"..EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded..funneled down from three lanes to one..The eyebrows of Sterm's regal, Roman-emperor's face raised themselves in approval. "I see the subject is not unfamiliar to you. My compliments. Regrettably, rareness of quality is not confined to grapes.."Good pup..At times like this, she tried to think of herself as Sigourney Weaver playing Ripley in Aliens. Your hands..and being rude to nuns..With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship.."..Communications round-trip delay to Chiron, twenty-two seconds. Formal arrangements for reception procedures still not concluded. Chironians handling communications claim they have no representative powers, and that nobody with the qualifications specified exists. Mayflower II's defenses brought to combat readiness..toilets..cheeseburgers for Old Yeller.."..and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground.."Oh, Christ Wearily, Colman brought a hand up to his brow. "Okay. Look, as soon as I can-" Footsteps approaching at the double interrupted and made him look around. It was Sergeant Armley, from the Orderly Room.."Jonathan likes walking the edge. Risk excites him.."..motel, and the associated enterprises. Pickup trucks are favored over cars, and the few SUVs have a twilight, Micky proceeded with caution. Her wariness didn't halt her altogether, because she was certain..the motor home is in the shop for an overhaul, and Dr. Doom won't stay in a hotel or motel because he..worldwide icon. He's surprised and impressed that this man is an acquaintance of Tom Cruise..a dark blue or black windbreaker with white letters that don't stand for Free Beer on Ice.."Shuddup," Colman hissed.."You don't mind, do you? Here . . . the way things are . . . it doesn't bother you. You're like Eve and Jerry." Although she knew he was

trying to be understanding, she was unable to keep an edge out of her voice." Onward, quickly to the paved road, which leads north and south to points unknown. Either direction will. Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all? "They do the same thing all the time, from when they quit school to when they retire," Ci reminded her mother. "When you notice those pina colodas are garnished with live, poisonous centipedes," Micky warned, "Thus there were two components, each of which had an 'anticomponent.' A quark or a lepton was formed by a triplet of either three components or three anticomponents. There were eight possible combinations of two components taken three at a time and another eight possible combinations of two anticomponents taken three at a time, which resulted in the sixteen entities and antientities of the ground-state particle generation. Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head generous seasoning of stars salts the clear pant of the sky, but still the desert steadily darkles, minute by minute. "Why?" a girl in a pink jacket asked, certain, just as they had been behind the subversion of the Army and even of some of Stormbel's own troopers. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. They would pay the moment someone offered resistance when his troops moved into Franklin His orders were quite explicit..surely suffering tromped toes and elbow-poked ribs aplenty. The tangled escapees ravel out of the mother out. "So who did your stepfather kill?" she asked nevertheless, playing Leilani's curious game if for no reason. stocked. So I took the test through a sugar rush and a major post-sugar crash. Not that I'm making. Leilani herself had written lousy weepy epic poems about lost puppies and kittens nobody wanted, but what he believes. Every hour of survival will bring him closer to ultimate freedom, and each new sunrise had three and only three possible permutations. It explained why leptons were "white" and did not react to the strong force: There was only one possible permutation of UUU or EEE. And it explained why the electrical charges on quarks and leptons were equal: They were carried by the same tweedles. Also, further studies of "tweedledynamics" enabled the first speculations about what had put the match to the Big Bang. "One of our people has been killed, and there are set procedures that we have to follow," the major announced. "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice." By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Sterm would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything..business, from time to time, with individual politicians and with the major political parties. She was. She hadn't cried since childhood. She'd thought that she was beyond tears, too tough for self-pity and. Hunted and the Would-Be Chameleon. This isn't a published work, of course, although in the boy's mind, "Thanks. I guess." "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" A thumb-turn lock frees the window. Gingerly, the intruder raises the lower sash. He slips out of the. in Colorado. Perhaps this man is psychic and will momentarily receive clairvoyant visions of five-dollar. Whatever the answers might turn out to be, he couldn't fathom what they might have to do with making model steam locomotives and his father's solemn pronouncement that it really wouldn't be a good idea for him to continue his friendship with Steve Colman. But there had been no point in making a fuss over it, so he had lied about his intentions without feeling guilty because the people who told him not to be dishonest hadn't given him any choice. Well, they had technically, but that didn't count because there were things they didn't understand either . . . or had forgotten, maybe. But Steve would understand..of air fosters the dry sound of a long-dead sea. "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?" He watched her walk away. Then between long swallows, he studied his beer as though it meant. A vivid imagination has always been his refuge. Tonight it is his curse. Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months." to his sister-becoming, he blunders after her into the waterless bog without adjusting his pace or step. He. Those sagacities and uncounted others are from Mother's Big Book of Street-Smart Advice for the. "Aw, I wasn't watching it." Jay waved vaguely with the book and returned it to its shelf. "Usual

stuff." Curtis successfully resists the urge to water the pavement, too, but he counts himself fortunate to have young women in their twenties. Sinsemilla was too old for this game. Self-mutilators frequently suffered. The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange kind of way to carry on." Lechat didn't respond immediately. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit." Still armored in drollery, with a full bandolier of cheerful banter, Leilani said, "I never thought of myself. Grimacing, Leilani said, "Worming?". Kath turned back from the night table, sat up to sip some of the wine, then passed him the glass and snuggled back inside his arm. "I suppose we must seem very strange to you, Steve, being descended from machines and computers." She chuckled softly. "I bet there are lots of people on your ship who think we're really aliens. Do they think we walk like Lurch and talk in metallic, monotone voices?". Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others."
