"Maybe we should be looking for the niche it occupies. The way you describe it, it couldn't function without help from a symbiote. Maybe it fertilizes the plants, like bees, and the plants either donate or are robbed of the power to wind the spring. Did you look for some mechanism the bug could use to steal energy from the rotating gears in the whirligigs?".breakfast?".Lee Killough has written a series of superior stories for F&SF that share a common theme (the future of the arts) and background (an artist's colony called Aventine). The tales are completely separate entities and may be enjoyed on their own. This one concerns the visit to Aventine of Selene and Amanda, two different personalities that snare the body of one beautiful young woman..She could have sent Teddy on his way with a few polite words instead of making an incident of it. There's an evolutionary advantage to sexual reproduction that more than makes up for all the inconveniences.* In cloning, the genetic contents of new organisms remain identical with those of the original organisms, except for occasional mutations. If the organism is very efficiently adapted to its surroundings, this is useful, but it is an extremely conservative mechanism that reduces the chance of change. What I don't know, I could learn. Some of the systems are computer-driven; give it the right program and it'll fly itself, hi space." She looked longingly at the controls, and Crawford realized that, like Weinstein, she didn't relish giving up the fun of flying to boss a gang of explorers. It isn't here now, but it can be created by properly designed plants. They engineered these plants. Call him Smith. He was the president of a company that bore his name and which held more than a hundred patents in the scientific instrument field. He was sixty, a widower. His only daughter and her husband had been killed in a plane crash in 1978. He had a partner who handled the business operations now; Smith spent most of his time in his own lab. In the spring of 1990 he was working on an image-intensification device that was puzzling because it was too good. He had it on his bench now, aimed at a deep shadow box across the room; at the back of the box was a card ruled with black, green, red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow box; the light reflected from the card did not even register on his meter, and yet the image in the screen of his device was sharp and bright. When he varied the inputs to the components in a certain way, the bright image vanished and was replaced by shadows, like the ghost of another image. He had monitored every television channel, had shielded the device against radio frequencies, and the ghosts remained. Increasing the illumination did not make them clearer. They were vaguely rectilinear shapes without any coherent pattern. Occasionally a moving blur traveled slowly across them. What the woman was saying was of a character to suggest that she had just that minute gone crazy. "The pain," she explained calmly to the ice cream section of the freezer, "only comes on when I do this." She stooped closer to the ice cream and winced. "But then it's pure hell. I want to cut my leg off, have a lobotomy, anything to make it stop. Yet I know the problem isn't in my leg at all. It's in my back. Here." She touched the small of her back. "A kind of short circuit. Worse than bending over is twisting sideways. Even turning my head can set it off. Sometimes, when I'm alone, I'll start crying just at the thought of it, at knowing I've become so damned superannuated." She sighed. "Well, it happens to everyone, and I suppose it could be worse. There's no use complaining. Life goes on, as they say." Lee Kitlough. and you realize that there are no secret places. And beyond you in the ghostly future you know that. 159. Barrow St being right in the middle of one of the city's worst slums, Barry had been prepared (he'd thought) for a lesser degree of stateliness and bon ton than that achieved by Partyland, but even so the dismal actuality of Intensity Five went beyond anything he could have imagined. A cavernous one-room basement apartment with bare walls, crackly linoleum over a concrete floor, and radiators that hissed and gurgled ominously without generating a great deal of heat. The furniture consisted of metal folding chairs, most of them folded and stacked, a refreshment stand that sold orange juice and coffee, and a great many freestanding, brimful metal ashtrays. Having already forked out twenty-five dollars upstairs as his membership fee, I was sitting there, wondering how in hell I would find him, when the phone rang again. Miss Tremaine stopped typing and lifted the receiver without breaking rhythm. "Mr. Mallory's office," she said crisply, really letting the caller know he'd hooked onto an efficient organization. She put her hand over the mouthpiece and looked at me. "It's for you? an obscene phone call." She didn't bat an eyelash or twitch a muscle. for the power switch with his other hand.
