But that night, as the rain poured over the deck, and the drum-drum-drumming of heavy drops lulled everyone on the ship to sleep, Amos hurried over the slippery boards under the dripping eaves of the wheelhouse to the second hatchway, and went down. The lamps were low, the jailor was huddled asleep in a corner on a piece of grey canvas, but Amos went immediately to the bars and looked through..one-man show. It doesn't have the juice to orbit on the jets alone. The wings are folded up now. You probably didn't see them on the way in, but you saw the models. They're very light, supercritical, and designed for this atmosphere. Lou said it was like flying a bathtub, but it flew. And it's a skQl, almost an art. Lou practiced for three years on the best simulators we could build and still had to rely on things you can't learn in a simulator. And he barely got us down in one piece. We didn't noise it around, but it was a damn close thing. Lou was young; so was Cantrell. They were both fresh from flying. They flew every day, they had the feel for it. They were tops." She slumped back into her chair. "I haven't flown anything but trainers for eight years." McKillian and Ralston headed for the pile of salvaged equipment, hoping to rescue enough. It didn't surprise them too much. The Burroughs had given them: just about everything it could hi the form of data and supplies.
