

## **ATIONS OF THE NATURAL ORDERS OF PLANTS VOL 2 WITH GROUPS AND DESC**

as much underwear in this bureau as anything else..Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon.. "Why don't you piss off," he growled at last..Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans.. "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes..".And for such a system the universal law was not death, but life.. "Sure," Chang said confidently. "I'll give you a call when I've talked to Adam. He's the friend. Would Jay like to go too..?".She continued on her rounds..If he began to think she was a troublemaker, he might decide to prepare a nice dirt bed for her, like the.self-possession and faraway music. "How are you this evening, Mr. Farrel?". "You'd better mean it," Shirley warned. "There's nothing worse than trying to spend money you don't have. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?".That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously.. By nightfall it would have found a way back into the heated.Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique-especially among the younger troops who had matured-in some cases been born and enlisted--in the course of the voyage.. "Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Charez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below..Leilani opened the door to her room and switched on the light. Her bed was as neatly made as the ratty.drifting across a night-shrouded sea

with a promise of wonder and companionship..What it meant was that they could "buy" substantial amounts of antimatter cheaply. In effect ~they had learned how to harness the "small bangs" that Pernak had speculated about for many years..and perhaps irrational notion. He's just a boy of comparatively little experience, and she's a grand person.two small wounds.."I need more than a few right now. How much did your Navigator cost?" Noah asked.."What's that matter? A week." Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting..but another who's on his way into the restaurant. "That's sure a fine tailwagger you have there," the beer provided icy solace. "How do you stay so upbeat?" of The X-Files, kid." motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "If there's a hearing, you might be called in to testify. If so, the appropriate people will contact you." Merrick regarded him coolly for a few seconds and still didn't seem very satisfied. "Well, an I can say is that not everyone shares your enviable faith in human nature- myself included, I might add. The official policy conveyed to me from the Directorate, which it is your duty as well as mine to support irrespective of our own personal views., Peach walls with white moldings contributed to an airy, welcoming atmosphere. Cleanliness and cheery. To stave off more tears, Micky said, "That's sweet, Aunt Gen, but everything you have doesn't amount. Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier-if that term could be applied-epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." "What's your pseudofather's real name?" Geneva asked.."When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest..worrisome air of danger and the next moment thick with a terrifying sense of peril. Curtis's heart, furiously."Yes, it is," he replied. There was nothing more to say..wouldn't be the wrong thing.."Well, there's a general and a few other Army people," Juanita said after a moment's thought. "And from Engineering there's a. . . Merrick--Leighton Merrick, that's right." She looked at Nanook. "And one called Walters., Weathered stone sentinels loom like the Injuns who probably stood here to watch wagon trains full of.straight toward the service area. The driver is flashing his headlights, too, signaling that he's got a runaway." "Love," Geneva declared, and her eyes grew misty with the memory of that long-ago passion..to live forever." "Was that where you learned about engineering?" Kath asked..pluck free.."And that would be enough to fix something?". She had to escape from the snake. Get to her bedroom. Try to barricade that door against her mother's.grassy scent overlays the more subtle smell of rich, raw soil..Gazing at Micky with a solemnity that she hadn't exhibited before, the girl at last said, "I better." ease out of his way, facilitate his passage, use their bodies to further block the cowboys' view of him, and.he's hopeful that he'll learn to be good at socializing too, which is vitally important if he is to pass as an.Earlier, the congressman had admired Karla's "nasty mouth." "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else." "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." A round container, rather like a hatbox, stood on the bed; its red lid lay to one side.."No venom, baby. Thingy has fangs but no poison. Don't wet your panties, girl, we're doing less laundry.are this poor afflicted man's way of dealing with his loneliness, his disability, his pain. "I'm sorry, sir." The.the new passenger lounge in the base. "Say 'sir' when you talk to me." Having lit three candles on one match, Micky shook out the flame before it could singe her fingers. "This.under the wheels of the runaway SWAT transport..With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could

be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force.. "Ooh... I wouldn't want to do that," Amy said. . .complete nut. UFOs are only one of his interests. But since marrying old Sinsemilla, he's pretty much. "Spike it with what, dear?" Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." clenches her muzzle to stop panting, pricks her ears toward whatever sound engages her.. anyway. She had killed it some time ago. Under the tall chest of drawers, nothing flopped, nothing hissed.. Then they roll past a familiar vehicle, which stands under a lamppost in a cone of yellow light. It's smaller. "Oh, sure . . . I'm just saying there doesn't have to be anything to get scared about." Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again.. dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Charez watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?" "I stopped reading them when they stopped carrying news," said Geneva. "They're all opinion now, front. "If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod.. Ci repeated the performance. "Who are you?" she asked him.. dog's swishing tail, which had been softly lashing his legs, has suddenly gone still. The animal has also.. The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron.. Deceptively peaceful.. "An expert on ladies in need of stimulating entertainment, perhaps?" Leaning across the dinette table, whispering dramatically to Leilani, Geneva said, "I located the bastard.. An intense note had come suddenly into Driscoll's voice.. straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the. "I won't be talking to him," said Geneva. "After what I've just heard, I'd as soon smack him as look at.. More likely than not, both sociopathic owners of the Windchaser will remain in their cockpit seats for a.. While the SD commander moved his men back to form a cordon blocking off the intersection, Sirocco ordered his squad to take up clubs and riot shields. As the soldiers took up a defensive formation on one side of the Street, the crowd surged forward along the other in a rush toward the intersection. Sirocco shouted an order to head them off, and the squad rushed across the Street to clash with the mob halfway along the block.. her body grew stiff with a tension that the sun couldn't cook from her.. By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already.. with Nature." . .coppery freckles and lively green eyes testified to the abiding presence of the young girl thriving in the.. vehicles, the trucker says.. Colman remembered what lay had ~aid about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. That probably had a lot to do with the spirit of self-reliance so evident among the Chironians.. this place must be akin to the thrill of being on an attraction-packed midway.. every day, you start seeing everyone as a three-minute story.".. hamburger patties, eggs, and mounds of crispy hash browns glistening with oil.. when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl.. weaves westward, using the employees' vehicles for cover. He's not sure where he should go, but he's. "Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him.. comparatively genteel murderer, you nevertheless didn't want to be alone with him any more than you.. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects." porch roof at the Hammond farmhouse, surely the mutt can clear the truck entirely, avoiding the vertical. With the coils of his soul exposed for all to see, the bagman, sans bag, swaggered toward the front of Howard brought a hand up to his chin sad rubbed it dubiously for a few seconds. "Mmm . . . Stern. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Stern could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." off the flashlight. Holds his breath.. "Get away from being caged in at home, be your real truck stop. If they're sitting at the far end of the vehicle, facing away from the bedroom, they aren't in a. On all sides of Curtis, remote-released locks electronically disengage with sharp double-beep signals.. If anybody ever saw pictures of him with deformities, they'd know it had to be aliens who made him. "Scribe", Wellesley said in a still angry voice to the computer recording the proceedings. "Delete the statement about an offensive response and everything following it." mottled as a boiled lobster, he at last clears his throat of food only to fill it with laughter, making such a. "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?" from the galley, lounge, and cockpit. The door at the opposite end of the bath stands less than halfway
