"These are what I need," said Amos, putting on the clothes quickly, for he was beginning to get chilly standing in his underwear. Then he climbed over the edge of the boat into the swamp. He was so bright and colorful that nobody saw the figure hi dirty rags run quickly behind them to the far end of the ship and also climb over into the swamp. Had the figure been Amos? it was wearing Amos' rags? the red hair might have attracted some attention, but Jack's hair, for all his colorful costume, was a very ordinary brown. His back is to you; you know you are safe, and you sit up. A jay passes with a whirl of wings, settles on a branch. With your own eyes now you can see Bruce, only a dot of blue beyond the gray shake walls of the houses. In the viewer, he is turning toward you, and you duck again. On December 12, 1968, I gave a talk to a meeting of doctors and lawyers in San Jose, California. * Naturally, I was asked to speak on some subject that would interest both groups. I spoke on genetic engineering instead, therefore, and, toward the end, discussed the matter of cloning. publisher's category (that, historically, is what it is) of heroic fantasy. I don't need to bad-mouth Pool Andersen, James Blish having already adequately done so, calling him (in his heroic phase) "the Thane of Minneapolis. . . . And daydreams about being tall, handsome (or beautiful), noble, admired, and involved in thrilling deeds is not the same as the as-if speculation which produces medical and technological advances. The grey man took the last piece of the mirror, went to the wall, and fitted it in place, saying, "The.117." "That," said Amos, "is the other end of the far rainbow." "What about Amanda?" "This is what would kill us, Crawford. What's your first name? Matt. Matt, this baby is a flyer for the first forty thousand meters. It doesn't have the juice to orbit on the jets alone. The wings are folded up now. You probably didn't see them on the way in, but you saw the models. They're very light, supercritical, and designed for this atmosphere. Lou said it was like flying a bathtub, but it flew. And it's a skQI, almost an art. Lou practiced for three years on the best simulators we could build and still had to rely on things you can't learn in a simulator. And he barely got us down in one piece. We didn't noise it around, but it was a damn close thing. Lou was young; so was Cantrell. They were both fresh from flying. They flew every day, they had the feel for it. They were tops." She slumped back into her chair. "I haven't flown anything but trainers for eight years." "Two, we have enough water to last us forever if the recyclers keep going. "You're not going to meet anyone there but temps and various people who are out to fleece temps." "That, I'm sure, was just coincidence," said Michelle. "After all, we're speaking of only two cases, and neither of the individuals in question was particularly bright. Bright people wouldn't be so quixotic, would they?" She underlined her question with a Mona Lisa smile, and Barry, for all his indignation and outrage, couldn't keep from smiling back. Anyone who could drop a word like "quixotic" into the normal flow of conversation and make it seem so natural couldn't be all wrong. Zorph Commonwealth Network Message: Celestial Date 7654-57. Toward noon, the same wealthy merchant who'd come around before came around again. A bellow which, curiously, does not echo in the vast antechamber. "Sreen! SREEN!" without some sort of exhaust, you wouldn't last long. How is that accomplished?" He sat there in his bulgy sponge of a chair, grateful to be alone and able to take in the sheer size and glamor of the place. Partyland was an endless middle-class living room, a panorama of all that was gracious, tasteful, and posh. At least from here in the

He watched the disaster unfold before his eyes, silent except for the rhythmic beat of the alarm bell in his ears. The dome was dancing and straining, trying to fly.
