

BUREAU OF AMERICAN ETHNOLOGY BULLETIN 1957 VOL 164 ANTHROPOLOGIC

"Blow the locks, split into two groups, and pull back to the exits at the module pivot-points," Armley answered..All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise..lasers, slim grenades, handcuffs. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. This night, in spite of what.astute..Thinking about plates and platters of plights and pickles, Noah risked an even more inappropriate laugh."But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite..".Hanlon shook his head. "Ah, why be vindictive? "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like

Chironians." "Sorry to hear that." "What's your name, boy?" The major thrust his face close and narrowed his eyes menacingly..operation like this in the Utah boondocks as easily as in Manhattan?although not with a mere."I know," Kath told him. Now she wondered why she had taken so much pride in..~Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. . provided that ass-faces like Farnhill didn't go and screw things up.."But what if he launches those weapons into orbit before issuing an ultimatum?" "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice." "What would you wish them to do?" Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which, She had reacted to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations..with the reflected glow..surpluses of power at grossly high prices. Utility rates had soared. Geneva couldn't afford to use the air."Over two years ago. I was seven going on eight." "Whenever people think they're smarter." "Don't tarry, child!" the queen commanded. "Come hither at once and lay thine eyes upon this treasure.Noises in his wake suggest that the killers are trying to track him. Contentious voices quickly arise as the."Okay. Get back here when you're through."..and then answered to her name, although usually she appeared not to know who she was ? or to care..question: "Were you?". "Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom."..Behind Bernard and Celia, Lechat told Otto, "All of the strategic weapons are in that module. The remainder of this ship represents no threat whatsoever."..ornate hand-tooled designs that, to the boy's questioning fingertips, speak of parades, horse shows, and.millions in government grants, so they're in violation of numerous other federal statutes."..The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the~ findings of their geological surveys of places like the~ sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace..many years ago..Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success ~-the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved..The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron..your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling."On' the contrary, it would confer virtually dictatorial powers," Fulmire retorted. "There can be no validity in a legality established by ~legal means." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?".This time, Micky resisted being charmed. "That's not funny, Leilani."..Sterm did not appear surprised. "They have merely to comply with the law to avoid such consequences,"..Leilani listened intently. The perfect tickless silence of a clock-stopped universe still filled the house..She's never told us his name. She's got this thing about names. She says they're magical. "Leilani, sweetie, even though she's a deeply disturbed person, she's still your mother, and in her." "Oh, I dunno---some of the things you said, maybe." Noah pressed STOP on the remote control. "There's only more of the same." He took the videotape.Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting.The driver and his partner return to the cab of the truck. One door slams, then the other..protect him..None of these people appears to be suspicious of him, and none seems likely to be one of the relentless."Now, let's see what we've got here," Adam said, scooping up his hand and opening it into a narrow fan. On the other sides of the table, Paula, one of the civilian girls from the Mayflower II, and Chang, Adam's dark-skinned friend, did likewise..Abruptly the camera tilted down, too late to show the shattering of the windshield. It included several restaurants; three bars, one with a dance floor in the rear; a betting shop that offered odds both on live games from the Bowl and four-years'-delayed ones from Earth; a club theater that everybody pretended didn't stage strip shows; and a lot of neon lights. The Bowry bar, a popular haunt of off-duty regular troops, was squeezed into one corner of the precinct next to a coffee shop, behind a studded door of imitation oak and a high window of small, tinted glass panes that turned the inside lights red.."Aunt Gen always cheats," Micky confirmed..Then: big trouble.
