with him a boy of fifteen, Mote, a promising weatherworker who needed training at sea, and Sava,.a woman of sixty who had come to Roke with

him seven or eight years before. Sava had been one of the women of the Hand on the isle of Ark. Though she had no wizardly gifts at all, she knew

so well how to get a group of people to trust one another and work together that she was honored as a wise woman on Ark, and now on Roke. She

had asked Tern to take her to see her family, mother and sister and two sons; he would leave Mote with her and bring them back to Roke when he

returned. So they set off northeast across the Inmost Sea in the summer weather, and Tern told Mote to put a bit of magewind into their sail, so that

they would be sure to reach Ark before the Long Dance..The roasting pit took up the center of a huge domed chamber. Hurrying, sticklike figures

black against the blaze shoveled and reshoveled ore onto logs kept in a roaring blaze by great bellows, while others brought fresh logs and worked

the bellows sleeves. From the apex of the dome a spiral of chambers rose up into the tower through smoke and fumes. In those chambers, Licky

had told him, the vapor of the quicksilver was trapped and condensed, reheated and recondensed, till in the topmost vault the pure metal ran down

into a stone trough or bowl-only a drop or two a day, he said, from the low-grade ores they were roasting now.."Go on," the wizard said, and he

cow's halter. The result had not been the melting eagerness it had produced in girls he had used it on in Havnor and Thwil. Dragonfly had gradually

become silent and sullen. She ceased asking her endless questions about Roke and did not answer when he spoke. When he very tentatively

approached her, taking her hand, she struck him away with a blow to the head that left him dizzy. He saw her stand up and stride out of the

When he was a child he had liked to walk in mud. He remembered enjoying the cool of it rising between his toes. He still like to go barefoot, but no longer enjoyed mud; it was sticky stuff, and he disliked stooping to clean his feet before going into the house. When he'd had a dirt floor it hadn't mattered, but now he had a wooden floor, like a lord or a merchant or an archmage. To keep the cold and damp out of his bones. Not his own notion. Silence had come up from Gont Port, last spring, to lay a floor in the old house. They had had one of their arguments about it. He swore to keep her with him, to think of her, to think of her that night, but she faded away. By the time he opened the door of Master Hemlock's house he was reciting lists of names, or wondering what would be for dinner, for he was hungry most of the time. Not till he could take an hour and run back down to the docks could he think of her.. "It doesn't matter; I just want to get out of the station!".. out into the rain to feed the chickens..
