Shaw, Pauline Kael, Eric Bent-ley, and James Blish have all done it. That I'm doing it too, doesn't prove I'm in the same league, but it does indicate the persistence of the issues involved and that they occur outside, as well as inside, science fiction..And that was all there was to it-he had passed his exam with a score just five points short of the crucial eighth percentile. The gossip columnists speculated a great deal about how Amanda and hollow with excitement, his throat and tongue getting tingly. "Not lately. Zorphwar runs at A-I priority on our machine, which means that any other use of the machine is halted while Zorphwar computations are completed. As you may have noticed, it took approximately forty minutes for the machine to compute the paths through the galaxy of those torpedoes, to determine their impact points, and to calculate the radius of destruction of each burst. Normally such overloads are handled by adjusting the work load in the Computer Center. However, at three thirty yesterday, the Center was in the midst of printing the paychecks for the entire Computer Products Division. The little delay our game occasioned upset the very tight schedule for that operation. As a result, all checks from R through Z were not printed on time and failed to make the courier flight to the West Coast. That is the reason your paycheck was not delivered to you today. Regrettably, it is also the reason that Division President Tailing and Corporation Comptroller Westland were not paid this week. While you are more familiar than I am with the personalities at Headquarters, I suspect that both of these gentlemen like to receive their paychecks. I trust that, if any investigations come out of this little incident, you will do your best to emphasize the fact that the Zorphwar program has already been modified to permit the launching of no more than tea doomsday torpedoes in one attack. Thus, this particular problem will never occur again. Carmichael called. Her French poodle has been kidnapped. She wants you to find her. "A little higher, please." It was small comfort, but Nolan had no choice. And he was too tired to protest, too tired to worry. Once aboard the launch and heading back, he stretched out on the straw mattress in a sleep that was like death itself. He turned toward the suitcase, his back to me. The hump was artificial, made of something like foam. "We have been studying this problem for some time now, and we believe there is a solution. It would not be feasible to send a contingent of adult humans, either as a functioning community or in some suspended state, with the ship; it is in too advanced a stage of construction to change its primary design parameters. But then, why send adult humans at all?" He spread his arms appealingly. "After all, the objective is simply to establish an extension of our race where it would be safe from any calamity that might befall us here, and such a location would be found only at the end of the voyage. The people would not be required either during the voyage or in the survey phase, since our machines are perfectly capable of handling everything concerned. PROLOGUE. We sped through the city in what I judged to be a locomotive, although there were no tracks. "What new wonder shall I see?" I mused, for many were the sights shown me already. My guide, an illustrious professor, halted the machine. "Were you the one on duty?" Crawford asked her. Selene went on exercising. "She won't ask. People have been taking care of Mandy all her life. It comes into my left ear, on the in-house com circuit reserved for performer and me alone. "Yes, Tom?". The dome stretches up beyond the range of the house lights. If it were rigid, there could never be a Rocky Mountain Central Arena. But it's made of a flexible plastic-variant and blowers funnel up heated air to keep it buoyant. The editor hereby makes grateful acknowledgment to the following authors and authors' representatives for giving permission to reprint the material in this volume: "So what about the crude?" Ralston asked. He didn't completely believe that part of the model they dearest. Having come round to a sensible, accepting attitude, she turned from the freezer to witness the effect. In the audience was my good friend of three decades? the well-known science fiction writer, boo vivant, and wit, Randall Garrett. Out of the corner of my eye, I noticed a piece of paper placed on the podium as I talked about cloning. I glanced at the paper without quite halting my speech (not easy, but it can be done, given the experience of three decades of public speaking) and saw two things at once. First, it was one of Randall's superlative pieces of satiric verse, one, pulling a tattered paperback from his hip pocket. His friend shakes her head. "You?" He turns. She shakes her head. "Just my pa." I guess I look curious because she looks away and adds, "My. So there we are? a nice symbolic obtuse triangle. And yet? We're all just one happy show-biz family. O, give me a clone.
