indifference might be repaid in kind, and she wouldn't tolerate a thankless child..Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby.. "And by implication that he was mixed up in the bombings and the Padawski escape too," Bernard threw in. "Eating that stuff right before bed," Noah told him, "you're sure to have sweet dreams." Sadness found a surprisingly easy purchase in Geneva's smooth, fair, freckled face. "He was so." "What a perfectly appropriate word? raw." "I mean the bag. It's an airsickness bag." His grin faded. "Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--". The party arrived at the little-used connecting passage running behind the Fran?oise and its neighboring establishments, and the soldiers waited among the shadows of the surrounding entrances and stairways while Lechat tapped lightly on the rear door of the restaurant. After a few seconds the door opened and Lechat disappeared inside. Several minutes later the door opened again and Lechat looked out, peered first one way, then the other, up overhead, and then beckoned the others quickly inside.. "Hi," the paunchy man greeted amiably. "I'm Clem. These are Carla and Hermann, and Francine and Boris. The big guy here is Cromwell, and the little lady up top is Amy. ". "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. "Not if I have anything to say about it," Geneva promised.. EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to.. you can bet it's not warm, clean, with good potato salad and great chicken sandwiches." "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need." ". There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion.. foot.. "Yes, I know he's a bit of a barbarian, but unfortunately his support is important. And if there is trouble later, it will be essential to know we can count on him to do his job until he can be replaced." During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the

rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products..He is pleased by his ability to function in spite of his fear. "There are a lot more people down on the planet, and it's their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? Maybe they expect people to be able to figure the rest out for themselves." Tail wagging, the pooch pads into the bathroom?and straight toward the toilet cubicle..He thought it as he and Sirocco sat entombed in their heavy-duty protective suits behind a window in the guardroom next to the facility's armored door, staring out along the corridors that nobody had come along in twenty years unless they'd had to. Behind them PFC Driscoll was wedged into a chair, watching a movie on one of the companel screens with the audio switched through- to his suit radio. Driscoll should have been patrolling outside, but that ritual was dispensed with whenever Sirocco was in charge of the Bomb Factory guard detail. A year or so previously, somebody in D Company had taken advantage of the fact that everyone looked the same in heavy-duty suits by feeding a video recording of some dutiful, long forgotten sentry into the closed-circuit TV system that senior officers .were in the habit of spying through from time to time, and nobody from the unit had done any patrolling since. The cameras were used instead to afford early warning of. unannounced spot checks.. "Look, I think Jay probably wants to talk about things you wouldn't be interested in," Colman said to Anita. "Why.Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Sterm, and she can't make a move without being watched. She could be in real danger, Steve. She has to get away from there."..Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions.
